**Portfolio Drawdown**

This chart illustrates the drawdown of a portfolio over time, from December 2019 to December 2023. The y-axis represents the drawdown percentage, ranging from 0 to 25. The x-axis represents the date, with labels every three months. A red line tracks the drawdown, and the area below it is shaded red. The drawdown starts at 0, drops to approximately 10% in early 2020, recovers to near 0 by mid-2020, and then fluctuates between 0% and 15% until late 2022. It then drops sharply to a low of about 25% in early 2023, before recovering to around 10% by late 2023.
